GENERAL STATISTICS - 2021 SEASON

Year XI, Article¹ No. 127

Date of Report: December 10th, 2021

By *Rubén A. Báez*²

This report presents general statistics of the **ATP TOP 100** (Ranking updated to 2021.12.06) that have played at least 20 matches in the current season, regardless of their ranking. That is, if there are players with a ranking within the **TOP 100** of the **ATP** and they have not played at least 20 matches in the season, they do not enter this report (Example, **Dominic Thiem** with ranking 15, who played only 18 matches, not enters. On the other hand, **Andy Murray** ranked 134, played 29 matches, enters the analysis). Therefore, the tables below include the **TOP 100** tennis players who played at least 20 matches. The analysis period runs from 2021.01.01 to 2021.12.05. The **ATP** tournaments that are included are the **ATP Masters 1000**, **ATP 500**, **ATP 250**. The **Laver Cup** stats are included in this report. On the **ITF** side are included the **Australian Open**, **Roland Garros**, **Wimbledon**, **US Open** and the **Davis Cup**. The statistics correspond to the main draws, therefore the statistics of the qualifications of the tournaments mentioned above are not included.

As mentioned in the previous paragraph, this report shows only general statistics on the parameters usually used. The statistics on the performance (**GPI Ranking**®) of the players are presented in another report prepared in this regard (Article No. 128).

³ The Hard, Clay and Grass columns show the average duration per match in decimal format. To convert to the format hh:mm, the integer part must be taken as "hours" and the decimal part multiplied by 60. For example, Pablo Andujar (position 1) on hard court matches had an average duration of 2.1 hours, when it performs the conversion it fits like this: 2 hours and 6 minutes (0.1 x 60 = 6) of average duration per match in hard courts. The last column that averages all surfaces is already converted to the hh:mm format.
