WTA TOP 100 OF THE GENERAL PERFORMANCE RANKING[®] (GPI Ranking[®])

2023 SEASON

General Performance Index[®]
(GPI: General Performance Index): *"It is an index that measures the performance that a tennis player has had in a given period of time."* This index, not shown here, is used to build the "General Performance Index Ranking[®] or GPI Ranking[®]".

This index considers, for its calculation, a number of aspects such as the number of played matches and won, the serves, the points won with the serves, the returns, the

break points (saved and won) and the tie-breaks. Once the indexes are calculated for a given period of time, the 2023 season in this case, these indexes are sorted from the highest to the lowest and a ranking is established. This ranking is the **General Performance Index Ranking[®] or GPI Ranking[®]**, which is used to order players by performance in the analyzed season. As already mentioned in other articles, the **WTA Ranking** must not necessarily coincide with the **General Performance Index Ranking[®]**,
