GENERAL PERFORMANCE INDEX (GPI) OF THE 2017 SEASON - ATP TOP 100

Date of Report¹: December 11st, 2017
By *Rubén A. Báez*²

General Performance Index (GPI): *"It is an index that measures the performance that a tennis player has had in a period of time."*

This index considers for its calculation several parameters such as: the number of matches played and won, serves, points won with the 1st and 2nd serves, returns, break points (saved and won) and tiebreaks.

The **GPI** is calculated monthly or annually and for each kind of surface (Hard, clay and grass) too. The database for its calculation starts from May 2010 to the present. The main idea is to be able to compare the performance of the tennis players in a homogeneous way, that is, in a period of analysis "t", compare the performance of the tennis player A versus the performance of the tennis player B and determine which of the two tennis players had a better performance in the period "t" (month, year, etc.). The general representation of the formula is:

$$\text{GPI} = f [\text{P}_i, t, s (\text{H}, \text{C}, \text{G})]$$

being:

P_i = parameters, for i between 1 and n

¹ Report elaboration based on data from official Websites:

www.AustralianOpen.com

www.RolandGarros.com

www.Wimbledon.com

www.USOpen.org

www.ATPWorldTour.com

www.DavisCup.com

LaverCup.com

² Tennis Instructor (Argentine School of Tennis Instructors, Buenos Aires), Bachelor in Business Administration, Public Accountant, Post grade's degree in Finance Management and Capital Markets, MBA (IAE Business School, Austral University, Argentina).

t = analysis period,

s = type of surface (H: hard, C: clay or G: grass). If this parameter does not appear in the formula, it is because it contains "all" surfaces.

Another way to present the **GPI** would be:

GPI = f [Pi, t] → GPI Total surfaces

GPI-H = f [Pi, t, s (H)] → GPI of Hard surfaces

GPI-C = f [Pi, t, s (C)] → GPI of Clay surfaces

GPI-G = f [Pi, t, s (G)] → GPI of Grass surfaces

The index has been tested and accurately exposes the order of the players performance. It is for that reason that we have put in the laborious work of calculating the **GPI** from May 2010 to November 2017. We will continue calculating it in the future and publishing it from now.

These indexes are designed for that analysts, coaches and tennis players can analyze them and draw out their own conclusions. You will notice that many times there are players who have **better GPI** than other players with better ranking. I have tried to find explanations for this and, in my opinion, it is due, among other things, that many Top players win games without playing well, with poor performance regard the parameters, but win anyways (For example, playing well the important points). Of course, there are other reasons that explain these aspects and that are implicit in the statistics that are used for the **GPI**.

For the annual and monthly determination of the **GPI**, all the players who participated in the season have been taken, regardless only the TOP 100 of the ATP ranking is shown in this report.

The used statistics to calculate the annual *General Performance Index (GPI)* come from:

- a) ATP World Tour 250, 500, 1000, Next Gen ATP Finals and Nitto ATP Finals Tournaments.
- b) Australian Open, Roland Garros, Wimbledon, US Open.
- c) Davis Cup.
- d) Laver Cup (Exhibition Tournament)

The Olympic Games are included in the annual **GPIs** for the 2012 and 2016 seasons (not shown in this report).

This report exposes for the 2017 Season:

- 1) General Performance Index for all surfaces (**GPI**) - Table 1, page 5,
- 2) General Performance Index for Hard Surfaces (**GPI-H**) - Table 2, page 9,
- 3) General Performance Index for Clay Surfaces (**GPI-C**) - Table 3, page 13,
- 4) General Performance Index for Grass Surfaces (**GPI-G**) - Table 4, page 17.

PLAYED MATCHES BY SURFACE – 2017 SEASON

Surface	Played Matches	%
Hard	1.685	58,3%
Clay	875	30,3%
Grass	328	11,4%
Total	2.888	100,0%

Note: The number of matches played per surface of the previous table correspond only to those considered for the calculation of the GPI of this report and come from the above-mentioned tournaments.

TABLE 1

GENERAL PERFORMANCE INDEX FOR ALL SURFACES (GPI) – 2017 SEASON

Pos.	Name	Surname	Ranking	Country	Played Matches	GPI
1	Rafael	Nadal	1	Spain	80	180,26
2	David	Goffin	7	Belgium	83	168,18
3	Alexander	Zverev	4	Germany	77	159,15
4	Dominic	Thiem	5	Austria	77	153,54
5	Roberto	Bautista Agut	20	Spain	69	141,06
