³ The Hard, Clay and Grass columns show the average duration per match in decimal format. To convert to the format hh: mm, the integer part must be taken as "hours" and the decimal part multiplied by 60. For example, Ernests Gulbis (position 1) on hard court matches had an average duration of 1.8, when it performs the conversion it fits like this: 1 hour and 48 minutes (0.8 x 60 = 48) of average duration per match in hard courts. The last column that averages all surfaces is already converted to the hh: mm format.
