MONTHLY REPORT

TOP 30 OF THE GENERAL PERFORMANCE RANKING[©] (GPI Ranking[©])

2019 SEASON, MARCH

General Performance Index[©]
(**GPI: General Performance Index**): *"It is an index that measures the performance that a tennis player has had in a given period of time."* This index, not shown here, is used to make the "**General Performance Ranking[©]** or **GPI Ranking[©]**".

This March, the podium of the best **Top 30** of the **General Performance Ranking[©]** is made up of the Canadian **Bianca Andreescu**, the Czech **Marketa Vondrousova** and the German **Tatjana Maria**. As you can see none of the three is **Top 10** of the **WTA Ranking**.

9 Top 10 of the **WTA Ranking** are included in the **Top 30** of the **GPI Ranking[©]**. The only exception is the American **Sloane Stephens** (8) who had little participation in the month of March losing in **Indian Wells** in the first round against the Swiss **Stefanie Voegele** (Ranking WTA 109) and in the second round

against **Tatjana Maria** (Ranking WTA) 62) at the **Miami Open**.

The Czech **Karolina Pliskova** and the Aus-sie **Ashleigh Barty**, are other of the two ten-nis players of better performance during the month of March. Another outstanding tennis player has been **Venus Williams** with a great performance in the month under analy-sis.

Soon we will be delivering a quarterly report that will analyze these same concepts. We assume that, some players will stand out more one month than in another. The interesting thing will be to see the **General Performance Ranking[©]** for a longer period of time, 3 months in this case. Here the concept of "regularity" in the season is implicit.

Next, the tables of the **Top 30** are shown in each aspect analyzed.

¹ Report elaboration based on data from official Websites:
www.WTAtennis.com
