<sup>3</sup> Las columnas Dura, Arcilla y Césped exponen la duración promedio por partido en formato decimal. Para convertir al formato hh:mm se debe tomar la parte entera como "horas" y la parte decimal multiplicarla por 60. Por ejemplo, Yafan Wang (posición 1) en cancha dura los partidos tuvieron una duración promedio de 1,8, al realizar la conversión nos queda: 1 hora y 48 minutos (0,8 x 60 = 48) de duración promedio por partido en canchas duras. La última columna que promedia todas las superficies ya está convertida al formato hh:mm.
